

# Problem Set 8 for Math 30

Date Due: April 20, 2011

April 18, 2011

Chapter 11 Problems (Sections 11.1-11.8):

4 (by hand), 8 (by hand or using R - if R, include the R output page like I gave in class), 18a, 20 (argue from the form of the log-likelihood, you don't need to complete the optimization), 31, 33, 37, 45, 51, 52

Note: For 18, skip b. The book is not clear at all with what it wants for b.
